General information on the ISFR, applying for membership of the ISFR, ISFR conferences, subscription to *Fluoride* in hard copy (online assess is free), and manuscript submission

• **ISFR and *Fluoride:*** The International Society for Fluoride Research (ISFR) was founded in 1966 at a meeting in Detroit of the American Society for Fluoride Research to promote the sharing of scientific information on all aspects of inorganic and organic fluorides. This is done by publication of the peer-reviewed quarterly journal Fluoride and the sponsoring of international conferences.

• **Scope of *Fluoride, Quarterly Journal of the International Society for Fluoride Research Inc*.**: *Fluoride* is published on a rolling publication basis in both print (ISSN 0015-4725) and online (ISSN 2253-4083) and contains peer reviewed scientific reports on agricultural, analytical, biochemical, biological, chemical, clinical, dental, ecological, environmental, industrial, medical, metabolic, pharmacological, political, sociological, synergistic, toxicological, and veterinary aspects of inorganic and organic fluorides. The journal does not contain advertising.

• **Membership of the ISFR:** Bona fide fluoride researchers are invited to apply for membership of the ISFR. Membership allows participating in the activities of the Society and voting at business meetings. No membership fee is payable. Application for membership may be made by an E-mail letter to Dr Spittle, E-mail: spittle727@gmail.com , including name, postal address, E-mail address, and the area of fluoride research the applicant is involved in.

• **Conferences:** The first ISFR conference was held in Frankfurt am Main, Germany in 1967 and subsequent conferences have been held in Spain, Austria, the Netherlands, England, the United States of America, Switzerland, India, Japan, Hungary, the People's Republic of China, Poland, New Zealand, Canada, Iran, and Thailand. The next conference, the 36th, will be hosted by Dr Javed Ahsan Quadri, All India Institute of Medical Sciences, New Delhi, India, will host the following Conference in New Delhi, India, in 2024. The tentative dates are 13-15 November 2024. The venue will be the All India Institute of Medical Sciences, New Delhi, India. Attendance at the conferences is welcomed for all interested in fluoride research

• **Position of the ISFR on issues such as water fluoridation and environmental fluoride pollution**: The Society does not hold an official position on issues, such as water fluoridation and environmental fluoride pollution, but encourages, through its conferences, and the publication of papers, commentaries, and letters to the editor, a critical examination of the scientific basis of the views which are held by individuals and organizations.

• **Article processing charges:** *Fluoride* is available as a free online diamond (platinum) open access journal at https://www.fluorideresearch.online and https://www.fluorideresearch.org . No article processing or submission charges are made. From 1 September 2023, articles should be submitted using the template on the website https://www.fluorideresearch.online and https://www.fluorideresearch.org and will be published on a rolling publication basis as soon as they are accepted.

• **Citations:** Citations of papers published by rolling publication should be by journal name, year of publication, volume number and E-publication number. e.g., Fluoride, Epub 2023;56:e237.

• ***Fluoride* in hard copy:** *Fluoride* will continue to be available in hard copy for a subscription fee of US$183 for 2024 and will be printed in approximately A4 size to match the new template. Citations however should still be as above. New page numbers will not be allocated in the print version but a year of publication, volume number and issue number will be given.

• **Subscription options:** The rates for Fluoride ISSN 0015-4725 in hard copy for 2024 have been kept the same as for 2023. Free access to Fluoride as an open access journal will remain at https://www.fluorideresearch.online and https://www.fluorideresearch.org

The rates for 2024 (set at the exchange rates present on 12 October 2020) are: US$183, Canadian$240, £140, Japan¥19,000, €155, Australian$253, or New Zealand$275. A NZ$9 discount is available if it is posted to a NZ address, i.e. NZ$269, and a discount of A$6 is available if posted to an Australian address, i.e., A$247, as the postage is less. The cost of back issues has been kept at US$20 per issue. The subscription charges may be paid in any of the above currencies.

• **Agency discount:** No agency discount is available.

• **Electronic access** to the online version, ISSN 2253-4083, is available free at https://www.fluorideresearch.online and https://www.fluorideresearch.org. No password required. It is not necessary to have a hard copy subscription to access the free online access. Volume number for 2024 is 57.

• **Payment options for subscription to *Fluoride* in hard copy and the purchase of back issues** are: bank transfer, credit card, or cash.

• **Bank transfers** can be made to The Bank of New Zealand, New Lynn Branch, 3029 Great North Road, New Lynn, Auckland, New Zealand; Swift BKNZNZ22; Website: http://www.bnz.co.nz ; Fax 64 09 827 6806; Account name: International Society for Fluoride Research; Account number 02 0184 0333239 000. Cheques are no longer accepted in New Zealand.

• **Credit card payments by VISA or Mastercard** may be made at: https://www.renaissancebooks.co.nz/product/30773 Alternatively, the Renaissance Books website at https://www.renaissancebooks.co.nz can be searched using Fluoride or Fluoride Journal. Subscription payments can be made at the rate of NZ$275 for 2024. As part of the check-out process, you will enter your shipping address and choose a shipping option. However you will not have to pay the shipping amount shown, and will only be charged NZ$275. Issues will be sent by airmail, letter rate. The website just collects the card details, and then the treasurer will make the actual charge to the card of NZ$275. Each issue is about 60 pages. Page dimensions: 297 x 209mm. An exchange rate converter is available at **www.xe.com/ucc.**

• **Cash** as US$, Japanese Yen, and other currencies are fine. Please do not send Canadian or British postal notes as they cannot be negotiated in New Zealand.
Cash may be posted to:
The Treasurer
International Society for Fluoride Research
PO Box 335
Dunedin 9054
New Zealand

• **Copyright and article processing charges:** Fluoride is owned and published by the International Society for Fluoride Research. © 2024. All rights reserved. No article processing or article submission charges are made. A printer's quality pdf of articles is made available on the website, http://www.fluorideresearch.online and https://www.fluoridereseaerch.org for downloading. Authors' have permission to republish their articles with acknowledgement that they were first published in *Fluoride* and giving the reference.

• **Online access:** *Fluoride* is a diamond open access journal available without an embargo period and with free full text at: https://www.fluorideresearch.online and https://www.fluoridereseaerch.org

• **Searching *Fluoride*:** Articles in *Fluoride* can be searched for using the Google custom search on the website by inserting, in the white box, appropriate key words such as author names, subject key words, and dates, and clicking on the search box. The results can be cleared by clicking on the u to the right of the search box. The search engine covers all articles on the website including the 35-year Cumulative Author and Subject Indexes and subsequent annual indexes.

• **Coverage of Fluoride:** Fluoride is covered by the search engines SciFinder Scholar (Chemical Abstracts Service), Web of Science (Thomson Corporation for Science Citation Index), Scopus (Elsevier), and ProQuest but not, at present, through MEDLINE/PubMed.

• **Copies of articles and previous issues of Fluoride:** Hard copies of most of the previous. issues of Fluoride, including the 35-year cumulative indexes in Fluoride 2002;35(4-Parts 1 and 2), are in stock and may be ordered directly through the Editor-in-Chief for US$20 or equivalent per single copy of an issue or part of *Fluoride*, including postage. Individual articles can also be downloaded, free in full text, from the ISFR websites at: https://www.fluorideresearch.online and https://www.fluoridereseaerch.org.

• **Hard copies of International Workshops on Fluorosis Prevention and Defluoridation of Water:** Hard copies of the First and Second International Workshops on Fluorosis Prevention and Defluoridation of Water in Tanzania, 1995, and Ethiopia, 1997, are also available for US$20 and US$23, respectively, including postage. Further details of these publications are in Fluoride 2002;35(3):150-2. The proceedings of the first, second, third, and fourth International Workshops on Fluorosis Prevention and Defluoridation of Water are available as free downloads from: http://www.defluoride.net/

• **Instructions to authors**: Manuscripts, including reports of original research, papers presented at ISFR conferences, research reviews, discussion papers, and letters to the editor, are accepted for publication after appropriate evaluation and recommendation by qualified reviewers. Papers should be submitted to the nearest region editor using the template on the website at https://www.fluorideresearch.online and https://www.fluoridereseaerch.org

• **Ethical standards:** The Editorial Officers of Fluoride strongly support the maintenance of the highest standards of animal care and the control of discomforts to animals in research. Authors must indicate whether their institutional and national guidelines for the care and use of laboratory animals were followed. When reporting experiments on human subjects, authors should indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1964, as revised in 2013, available from: https:// www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects

• ***ICMJE recommendations:*** *Fluoride* follows the recommendations of the International Committee of Medical Journal Editors (ICMJE), and their Recommendations for the conduct, reporting, editing, and publication of scholarly work in medical journals, updated December 2013, and the ICMJE form for disclosure of potential conflicts of interest are available from: www.icmje.org. The recommendations describe author responsibilities for conflicts of interest, human and animal rights, informed consent, and ethical policies. The ICMJE conflict of interest disclosure form should be downloaded, completed electronically by each author, and then submitted to *Fluoride* with the manuscript. Authors should state if the ICMJE recommendations have been followed.

• **STROBE guidelines**: For observational studies in epidemiology, authors might consider using the guidelines in the STROBE statement. von Elm E, Altman DG, Egger M, Pocock SJ, Gøtsche PC, Vandenbroucke JP. The

strengthening the reporting of observational studies in epidemiology (STROBE) statement: guidelines for reporting observational studies. Epidemiology 2007;18(6):800-4. Available from: https://pubmed.ncbi.nlm.nih.gov/18049194/ STROBE checklists are available at: https://www.strobe-statement.org/

• **Ethical responsibilities and scientific misconduct:** The Editorial Officers of *Fluoride* recommend that authors study the information for authors on ethical responsibilities and scientific misconduct published by Elsevier and available, in section 3.6 on ethics in the pdf file Understanding the publishing process: how to publish in scholarly journals, the link for which is in section 2 on Prepare your paper for submission, in Publishing with Elsevier: step-by-step, available from: https://www.elsevier.com/researcher/author/submit-your-paper The material covers the areas of duplicate submission, research fraud including fabrication making up research data) and falsification (manipulation of existing research data, tables, or images), plagiarism (passing off another's work or idea as your own), authorship disputes (deliberately misrepresenting a scientist's relationship to their work on a published paper), conflict of interest (nondisclosure to the publication that you have a direct or indirect conflict that prevents you from being unbiased in your paper),
salami slicing (the 'slicing' of research that would form one meaningful paper into several different papers), and the improper use of humans or animals in research including absent or inadequate informed consent of human subjects, or maltreatment of laboratory animals, with articles available in English, Spanish, Chinese, and Japanese.

• **Complimentary copies:** Donors wishing to fund gift copies, which will be suitably inscribed, are invited to contact Dr Spittle.

• **Co-secretaries:**
