

Open access statement:

- *Fluoride* is an open access journal and endeavours to fulfil the Directory of Open Access Journals (DOAJ) definition of an open access journal.
 - *Fluoride* holds the copyright of scholarly works published in *Fluoride* but grants usage rights to others which allows for immediate free access to the work and permits any user to read, download, copy, distribute, print, search, or link to the full texts of articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose.
 - The full text of all content is available for free and open access without delay at <https://www.fluorideresearch.online> and <https://www.fluorideresearch.org>
 - - No embargo period
 - No requirement for users to register to read content
 - A subscription charge for the print version of a journal is made to cover the cost of printing and shipping (2025: US\$183 or NZ\$275; 2026: US\$368 or NZ\$585).
-

Journal website

- The journal has its own dedicated URL and homepage at <https://www.fluorideresearch.online> and <https://www.fluorideresearch.org>

from which scholarly works are normally accessible from any location

- Each article is available as an individual, full-text PDF article with its own unique digital address (URL) and digital object identifier (DOI) equivalent, e.g. e396.
- *Fluoride* does not include advertising.
- *Fluoride* displays the Clarivate Web of Science Impact Factor ([FLUORIDE impact factor 2025](#))
- The website is in English.

Author charges

- *Fluoride* does not have any charges for authors
- From submission to publication there are no:
 - submission fees
 - editorial processing charges
 - article processing charges (APCs)
 - page charges
 - colour charges
-

ISSNs

ISSNs (International Standard Serial Numbers): *Fluoride* (online) 2253-4083 and (print) 0015-4725

Quality control process

- The names and affiliations of the Rotating Editors-in-Chief, Regional Editors and Editorial Board are listed on the website at <https://www.fluorideresearch.online> and <https://www.fluorideresearch.org>

- The editorial board for the journal has approximately 30 members with appropriate qualifications and expertise. They do not all come from the same institution or country.
 - All articles pass through a quality control system (peer review) before publication.
 - The type and details of the peer review process must be stated on the website, including the process for special issues.
 - Normally at least two independent reviewers review each article.
 - A plagiarism checking service is not used routinely.
 - Endogeny is minimised.
 - The proportion of published research papers where at least one of the authors is an editor, editorial board member, or reviewer does not exceed 25% in any issues.
 - Articles normally display submitted/accepted/published dates.
-

Special issues

Fluoride may publish special issues or other content curated by a member of the Editorial Board or an appropriately qualified guest editor:

- The Rotating Editor-in-Chief is responsible for the content of the entire journal, including all special issues, which must fall within the scope of the journal
 - Special issue articles have the same editorial oversight as regular papers, including external peer review, and are clearly labelled as special issue articles.
 - The credentials of guest editors will be checked and approved by the Rotating Editor-in-Chief.
 - The Rotating Editor-in-Chief, a dedicated board member, or a number of board members will oversee the guest editors
 - Papers submitted to a special issue by the guest editor(s) will be handled under an independent review process and make up no more than 25% of the issue's total
-

Licensing

- Although Creative Commons licensing is not used by *Fluoride*, the journal grants usage rights to others which allows for immediate free access to the work and permits any user to read, download, copy, distribute, print, search, or link to the full texts of articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose similar terms and conditions should be applied.
-

Copyright

- *Fluoride* is an open access journal and endeavours to fulfil the Directory of Open Access Journals (DOAJ) definition of an open access journal.
 - *Fluoride* holds the copyright of scholarly works published in *Fluoride*, both on the website and in print, but grants usage rights to others which allows for immediate free access to the work and permits any user to read, download, copy, distribute, print, search, or link to the full texts of articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose.
-

Persistent article identifiers

- Each article is available as an individual, full-text PDF article with its own unique digital address (URL) and digital object identifier (DOI) equivalent, e.g. e396.
 - It is the aim of *Fluoride* that all persistent links resolve correctly.
-
